**General Comments**

Clear and cool

☐

See Thanh Le's diary for details on both the East and West Line. David Bradd left early.

•0630 field visit to go over bolt testing locations today. Zack Lauria informed me that the Wind Vortex Generator angle plates will be installed this morning at Lift 1E. According to the drawings, the nuts will be on the outside of the bridge. I looked at the location these are to be installed and reviewed the drawings for this operation.

•Gave a job tour for the Change Order group

•Diary work

•Punchlist work
